**“THIS IS NOT A WAR ON DRUGS.
IT’S A DEFENSE OF OUR BRAINS!”**

-Dr. Bertha K. Madras, Professor, Harvard Medical School

What is Let's Get Clear Georgia?

What We Do

Our advocacy efforts focus on protecting all of Georgia's children, teens, adults, communities and workplaces, and empowering them to protect themselves from the destructive effects of any form of marijuana lacking the approval of reputable medical associations.

Our Mission

To promote advocacy and other collaborative efforts using best practices and policies to prevent the expansion of “medical” marijuana legalization lacking the approval of established medical associations as well as to prevent recreational legalization in Georgia.

Numerous people are saying their or their child's medical condition has been helped greatly by taking cannabis oil.

Let's Be Clear Georgia applauds the sincere, heartfelt efforts of all those who are trying to find solutions to suffering due to serious medical conditions.

▶ But there is an untold side of the story that involves great tragedy and suffering for many more thousands of Georgians . . .

▶ Pre-Teens, Teenagers, Young Adults, and Adults who are addicted to THC . . .

Words you don't often hear about Marijuana

▶ How Does This Relate to Access?

- ▶ The costs of increasing access via in-state cultivation and manufacturing, as well as their regulation
- ▶ will have to be financed by increased demand and use, putting more Georgian's in harm's way
- ▶ from the harmful effects of THC.

5% THC Oil is Much Stronger than Most People Realize

5% THC Oil contains about 5 grams of THC in 100 milliliters of oil.

4 drops (from a standard medicine dropper) of 5% THC oil contain approximately 10 mg of THC.

4 Drops of 5% Oil =
10 milligrams of THC
=1 standardized serving of
an edible in Colorado

Just like alcohol is alcohol no matter what form it's in,

Johnnie Walker Blue Label Scotch

Both
contain
the
same
alcohol
that can
get you
just as
drunk

Mad Dog 20/20 Red Grape Wine

So THC is THC no matter whether you swallow it or smoke it:

Bottle of Medical THC Oil

Both contain
the
same THC
that can get
you
just as
High
&
Impaired
&
Addicted

Whole Plant Marijuana Joint

- ▶ 4 drops of 5% THC oil contains 10 mg of THC

- ▶ Especially someone who is a new user and has not built up a tolerance to THC can easily get intoxicated on 10 mg or 4 drops of 5% THC oil.

Both
contain
the
same
alcohol
that can
get you
just as
drunk

Johnnie Walker Blue Label Scotch

Mad Dog 20/20 Red Grape Wine

Bottle of Medical THC Oil

Both contain
the
same THC
that can get
you
just as
High
&
Impaired
&
Addicted

Whole Plant Marijuana Joint

The major difference between medical THC Oil and recreational THC Oil is that medical marijuana oil has “medical marijuana” written on the label.

“Medical Cannabis” per HB 65, can mean just about anything

A Few Concentrates

BHO

Budder

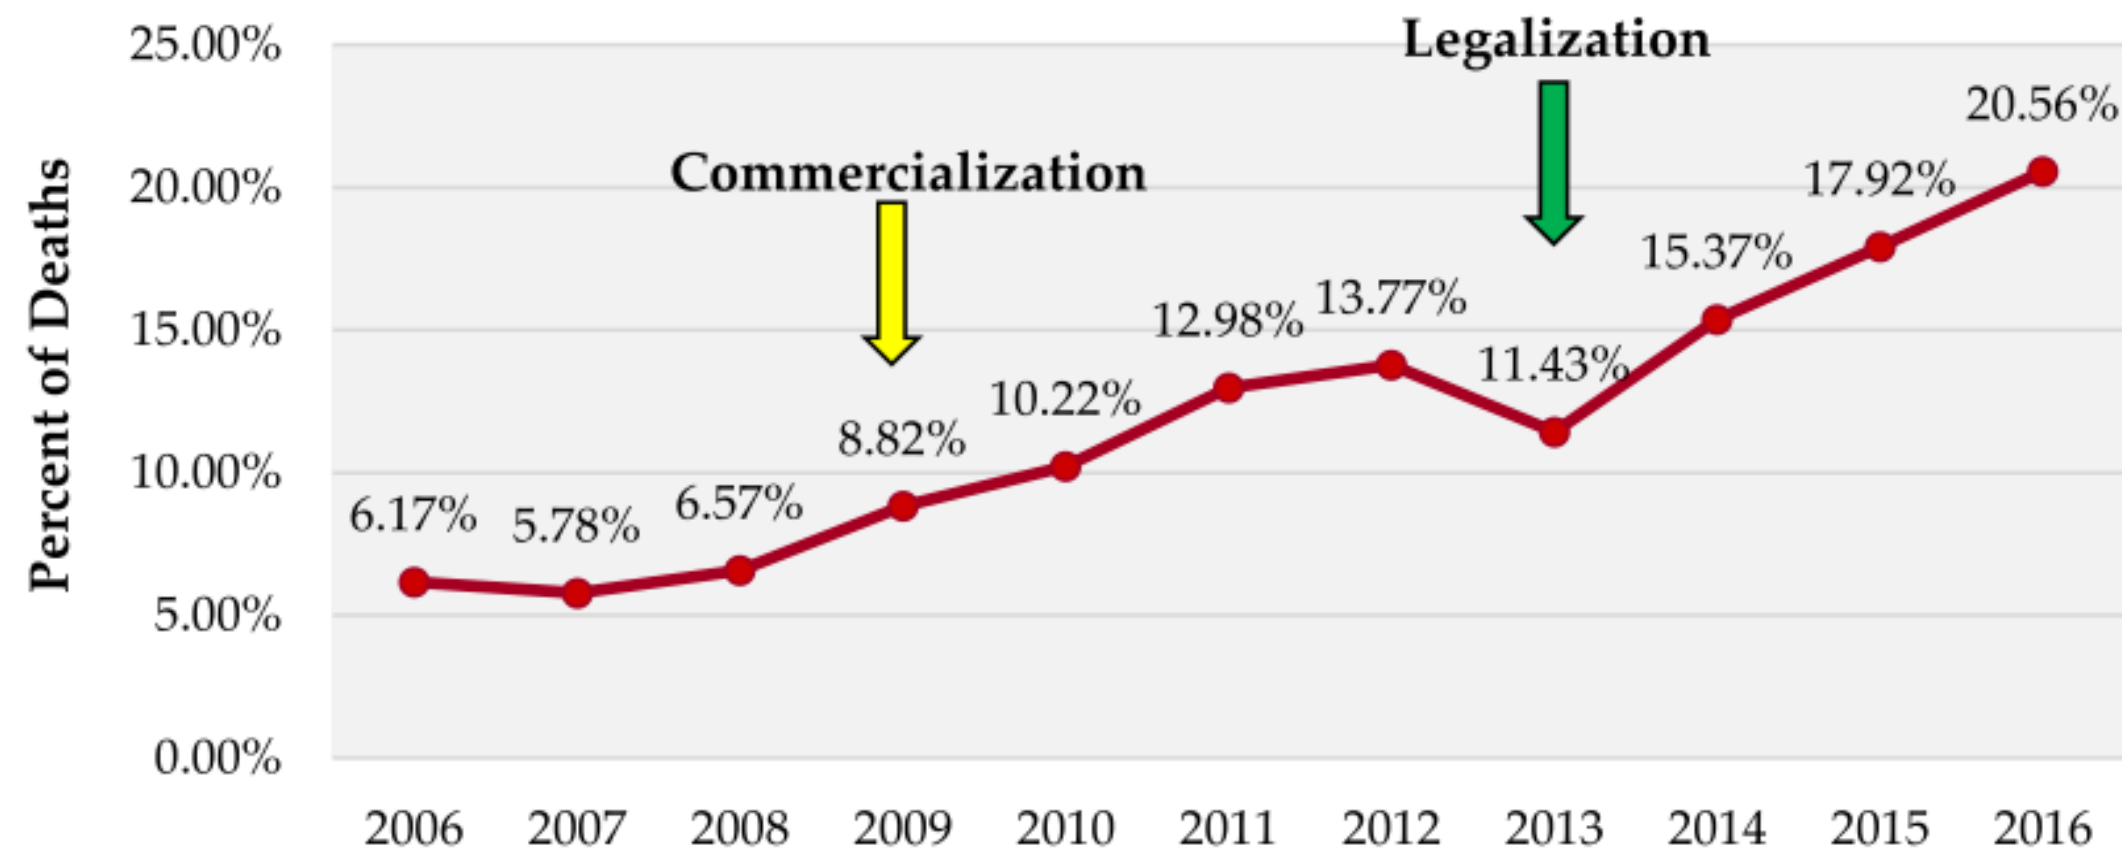

Wax

Shatter

Percent of All Traffic Deaths That Were Marijuana-Related when a Driver Tested Positive for Marijuana

SOURCE: National Highway Traffic Safety Administration, Fatality Analysis Reporting System (FARS), 2006-2011 and Colorado Department of Transportation 2012-2016

Broad Medical Legalization

Has Meant

De Facto Recreational Legalization

in other states

(just like they had legalized

Recreational Marijuana)
